Mr. Musée SCI	51074	M Musée Ugh Aerosol 350ml12	Netherlands	For the manufacturing sites there are no labor union but internal employee forum group and working labour council.	There are employees hired by both SCI and third party. For both manufacturing sites, we have attendance systems in place which will give information regarding employee presence, time in/out, overtime (paid/unpaid), and any anomaly clock in/out. Any overtime must be confirmed by the site leader and the manager. HR team verifies that the number of overtime is not excessive.	SCI has procedures in place to detect the use of forced labor by following the strict global SCI recruitment procedure, and local labor law.	No permanent employees are under the age of 18, only few interns for which we are following the local laws and universal/childhood agreements.	SCI takes necessary measures to avoid discrimination in the workplace, following global SCI procedures, training, small talk, communication material on the site to always remember this essential value in our company.	Internal SHE - Safety & Health teams in both sites, responsible to drive the Global SCI procedures and local law. Recurrent trainings delivered on site.	Workers are payed as a minimum living wage sufficient to meet basic needs.	Regular local Government certification and certification ISO which have regular internal and external audit.	NL, FR, DE, UK, US	No info	No info	No info	No info	No info	No info	No info	No info	No info	No info	No info	No info	SCI is in the process of mapping out their supply chain and assess the risks related to their products with regards to human rights and decent working conditions. This is, however, an ongoing project with no finished result at all yet. Therefore, Anad Nordquest lack this information and can not assess the risks related to Hopp's supply chain and the total risk of the product is high. The action plan will focus on gathering the

Risk description		
Low risk: Adequate measures in place. No need for action plan.	Medium risk: Some sufficient measures in place, not prioritized for action plan.	High risk: Lack of information or inadequate procedures in place. Action plan needed.
